INTRODUCTION

The overall goal of libraries the world all over is to best satisfy their users by providing relevant and up-to-date information. Librarians are dedicated to ensuring that information is always available, in retrievable formats and can be readily disseminated on request. But with the changing demographics of users, along with changes in technology and new courses, it will take a multi-generational hybrid Librarian to maintain relevant collections and services to meet the needs and desires of various patrons. To be able to serve the next generation users, Librarians are exploring ways on how to adapt to the new environment to create hybrid librarians.

There is therefore need to have a workforce that will be able to synchronize with the current & future library to provide relevant services.

Today, the key technology is information technology, which is also being adopted Library & Information Centres. Library professionals are hence required to be aware about the changing scenario and become well-versed with the technology & concepts in order to provide effective services .

Recognizing the need, the National Social Science Documentation Centre (NASSDOC), New Delhi and Centre for Research & Industrial Staff Performance (CRISP) are jointly organising a 4 days training workshop at CRISP, Bhopal.

With this background, the proposed training workshop has been designed so as to introduce the participants to the rapidly changing information scenario, and familiarise the participants with the Next Generation Librarianship.

OBJECTIVES

The objectives of the training workshop are to:
- Understand the new techniques for new generation librarianship for providing better services to users.
- Provide hands-on experience in the usability and transformation of information resources into digital media.
- Generate an awareness about new computer-based-services and develop a web-based library.

METHODOLOGY

The training programme consists of a mix of:
- Lectures & presentations
- Demonstrations
- Interactive sessions
- Hands on practice
- Field visits to local centres

COURSE CONTENT

- Introduction to Next Generation Librarianship: innovative practices
- Digital Libraries: Preservation & Archiving
- Open Source Softwares: Joomla (Content Management Software) for Website designing
- Open Source Software : KOHA (Library Management Software) for Library Automation
